

Assistant Acoustic Consultant

Manchester Office

With a history spanning over 50 years, Hann Tucker is one of the original names in acoustic consultancy and one of the largest independent acoustic consultancies in the UK. We work with leading property developers and world-renowned architects designing exceptional, award-winning buildings.

We are expanding our Manchester offices and are considering applicants for graduate consultants (Assistant Consultant).

This is an opportunity to be involved in some extraordinary projects that will see the creation of entirely new city neighbourhoods, skyscrapers, state of the art buildings for world-leading research, TV & music studios, conference halls, performance venues, multi-screen cinemas, luxury hotels, and more.

Successful candidates are likely to be those who exude enthusiasm and motivation to work hard and be successful. Our remuneration package is competitive, and we are confident you would find the work varied, rewarding and fun.

Experience Required

- Undergraduate or Masters Degree in Acoustics / Acoustic Engineering / Music Technology, or IoA Diploma in Acoustics and Noise Control. An undergraduate degree in physics or any engineering discipline will also be considered.
- Comfortable with mathematical principles such as logarithms and geometry.
- Experience of (or interest in) working with sound in the construction industry
- Enthusiasm about the built environment, engineering, environmental and sustainability issues.
- A full driving licence is required.
- Proficiency in Word, Excel, Teams and Outlook.
- Ability to work as part of a team.

Working as an Assistant consultant, you would assist consultants within the office/company on a range of tasks, including:

- Conducting site visits for noise and vibration surveys,
- Attending construction site visits for acoustic testing.
- Undertaking calculations using in house templates/software,
- Writing technical reports using in-house templates.

The person we are looking for would display the following characteristics:

- Can carry out their work, whether supervised or unsupervised, with consideration to internal deadlines set by the supervising consultant. This will involve providing a summary of tasks/to do lists to office managers at informal weekly office-wide meetings.
- Would develop a good working knowledge of common Standards, Codes of Practice, Legislation etc, pertinent to most common assignments within the industry.
- Has awareness of areas where increased competence is required, proactively undertaking independent learning/research and seeks further training/advice from senior staff. This will involve monthly “buddy chats” with their supervisor, covering technical competencies and setting and reviewing short-term and long-term objectives.
- Shows evidence of wishing to assume responsibility on projects and tasks within the company, using initiative when working on projects and other day to day tasks.
- Projects an image of competence and represents the company in a positive light when liaising with clients and other external parties.
- Can work well with clients and other staff, recognising when to seek advice from others.
